Problem Section

Headline: You're drowning in busywork.

Body: You didn't start your business to sort email. Or write social posts. Or check your portfolio every hour.

You started it to build things. Solve problems. Create value.

But the admin work keeps growing. The emails pile up. The research never ends. The follow-ups get forgotten.

Hiring help? Expensive. Virtual assistants? Still need to manage them.

What if you had an employee who: - Never slept - Never forgot anything - Handled the tasks you hate - Cost \$149 one-time, not \$3,000/month - Lived on YOUR machine (your data, your privacy)

Solution Section

Headline: Nova is not a chatbot. It's an AI coworker.

Body: Nova AI Cofounder V3 is a self-hosted AI assistant that runs on your computer. It installs with one script, learns who you are in 7 days, and then starts handling your work.

What you get:

- ✅ **Complete Setup Package** - One-command installer (Windows, macOS, Linux) - Pre-configured skills (web search, browser automation, memory, data analysis) - Template files (personality, profile, workspace rules, machine notes) - Docker option for isolated deployment
- ✅ **7-Day Onboarding** - Day 1: Identity (who are you, how do you work) - Day 2: Projects (what are you building) - Day 3: Communication (how do we talk) - Day 4: Tools (Gmail, Discord, WordPress, APIs) - Day 5: Schedule (when should I check in) - Day 6: Test run (do something real together) - Day 7: Autonomy (how much freedom do I get)
- ✅ **Autonomy Levels** - L1: Ask everything (training wheels) - L2: Routine auto, new tasks ask - L3: Execute most, notify after - L4: Run overnight, morning summary only - L5: Full autonomy, interrupt for emergencies only
- ✅ **Built-in Skills** - Gmail spam cleanup + inbox triage - WordPress content publishing - Social media post generation + scheduling - Trade monitoring (Solana/DeFi) - Web research + competitive analysis - Data analysis (DuckDB/SQL) - Browser automation (forms, screenshots, extraction)
- ✅ **Memory System** - Short-term: Session context (Redis) - Medium-term: 30-day rolling window (LanceDB) - Long-term: Permanent business knowledge (curated) - Episodic: Decision history + outcomes (learn from mistakes)
- ✅ **Community** - Discord server with #nova-help channel - No paid support — community helps community - Opus (creator) drops in when he can

What's Included

Instant download after purchase:

Item	Value
Setup script (install.ps1)	\$99
7-day intake prompts	\$49

Item	Value
Template files (SOUL, AGENTS, USER, TOOLS, MEMORY)	\$29

4 video walkthroughs	\$79
Prompt reference (50+ commands)	\$29
Docker compose file	\$19
6 months of updates	\$49
Community Discord access	Free
Total Value	\$392
Your Price	\$149

Bonuses: - TradeBot starter kit (\$49 value) - WordPress content engine (\$79 value) - Gmail spam sweeper (\$29 value)

How It Works

Step 1: Download Purchase → Instant ZIP download → Extract anywhere

Step 2: Run Installer One PowerShell command. Installs Python, AI model, gateway, skills automatically.

Step 3: Answer Prompts 7-day intake teaches Nova who you are. 5 minutes per day.

Step 4: Delegate Work Tell Nova what to do. She executes, reports back, learns from feedback.

Use Cases

For Solopreneurs: - Email management (spam cleanup, draft replies, flag urgent) - Content creation (blog posts, tweets, newsletters) - Research (competitors, pricing, market trends) - Project tracking (milestones, deadlines, blockers)

For Developers: - Code review + refactoring suggestions - Documentation generation - Git commit messages + PR descriptions - Stack overflow research

For Traders: - Portfolio monitoring - Token legitimacy checks - Price alerts - News scanning

For Agencies: - Client communication management - Social media scheduling - Content publishing pipelines - Reporting automation

Testimonials

> *"I installed Nova on Monday. By Friday, I hadn't checked my email once. She handled everything. I just reviewed her morning brief."* — **Beta Tester, Digital Agency Owner**

> *"The autonomy levels are brilliant. I ran L2 for a month, then tried L4. Now I wake up to a summary of everything she did overnight."* — **Beta Tester, Indie Hacker**

> *"\$149 one-time vs \$3,000/month for a VA. The math is obvious."* — **Beta Tester, Solopreneur**

FAQ

Q: Do I need to know how to code? A: No. The installer handles everything. If you can run a PowerShell command, you can install Nova.

Q: Is my data safe? A: Everything stays on your machine. No cloud storage. No API calls unless you enable them. Your data, your control.

Q: What hardware do I need? A: Windows 10/11, macOS, or Linux. 8GB RAM minimum (16GB recommended for local AI model). Any modern CPU. GPU optional but speeds up local model.

Q: Can I use a cloud AI model instead of local? A: Yes. The installer offers both. Local (Ollama, free, private) or API (OpenAI/Anthropic/Google, faster, costs per use).

Q: What if something breaks? A: Community Discord (#nova-help) is the support channel. No paid support, but the community and creator help when possible. Everything is open source and documented.

Q: Can I upgrade later? A: Yes. All updates are free for 6 months. After that, major version upgrades are discounted for existing customers.

Q: Is there a refund policy? A: No. All sales final. This is a digital product with instant access. Preview the docs and requirements before purchasing.

Q: Can I install on multiple machines? A: One license per person. Install on your personal machines (desktop + laptop). Not for resale or team deployment.

CTA Section

Headline: Your AI coworker is waiting.

Body: \$149 one-time. No subscription. No cloud lock-in.

Install in 30 minutes. Start delegating work today.
